Advanced Custom Engineered Systems & Equipment Co. (ACES)

is a team of trained professionals in the waste and recycling equipment industry. Our full service offering includes sales, installation and repairs for balers and compactors. We understand that each installation and repair is unique, which is why the ACES team is committed to excellent service so our customers maximize their productivity.

Each of our team members has extensive years of experience in the waste industry. With that level of knowledge, you can rely on us to understand your waste stream and equipment needs. That frees you up to focus on what’s really important: your business.

Our goal is to be the best waste service firm in your company’s experience.

We look forward to a long and successful partnership.

SALES

ACES has established professional relationships with the industry’s best equipment manufacturers, which means we can supply all makes of compactors and balers. Our experienced team of professionals will review every aspect of your waste stream and recommend the best equipment solution for your company. We are happy to provide a quote for rental or the purchase of used or new equipment.

ACES also features Cherry Odor granules. We guarantee these will dramatically reduce odor from waste sitting in your compactor.

We also sell baling wire sourced from a supplier in the United States, which lets us pass along very competitive pricing to you. Manufactured to the highest standards, we guarantee that this wire can handle all your capacity needs.

NATIONWIDE INSTALLATION/REPAIR SERVICE

Our nationwide network of skilled technicians allows ACES to manage all your waste equipment needs. Because our service technicians are so reliable, we guarantee you will be 100% satisfied with the work they perform. We respond to all calls within a 24-hour period and 7 days a week, and our national service network is fully insured. Reduce your company downtime and relax knowing your waste issue is on its way to being resolved by the ACES team...your go-to partner.

PREVENTATIVE MAINTENANCE

Nothing impacts productivity more than equipment breakdowns. Proactively checking your assets is one of the best ways to stay ahead of time-consuming, expensive repairs.

ACES offers a full preventative maintenance program. We’ll check the pressure settings and hydraulic fluid levels on your compactors and balers and provide any necessary service. We’ll check your metal machines to make sure that any moving parts are not suffering from metal fatigue. This kind of preventative maintenance is a cost-effective way to extend the life of your baler and compactor and may save you a considerable amount of money in the long run.

ACES also offers professional cleaning services. Every year, our technician will clean, deodorize and disinfect your compactor and chute. We also clean the hopper door , and we check and adjust the alignment and tension.

Distribution Centers/MRF Repairs

ACES provides waste and recycling solutions for distribution centers, warehouses and MRFs. We will conduct a detailed assessment of your facilities and provided you with an engineered plan that can service:

- Cardboard
- Packing material
- Light scrap metal
- Shrink wrap

ACES provides the kind of service and support you need to keep your company productive—not just for the short-term, but for the life your business.

Our customer service team and office support staff are highly trained professionals with years of experience. They take pride in doing the right thing for the customer, all the time. We guarantee that you will always get the help you need, every time you contact us.

The Benefits of Preventative Maintenance

- Proactively manage your assets
- Reduce downtime
- Extend the life of your equipment
- Know your assess are functioning at their best
- Reduce hauling costs with proper pressure settings
